### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

#### In the Claims

In claim 13: line 3, "compensation means" has been replaced with – compensating device --, otherwise "the compensation means" recited has no antecedent basis.

In claim 14: line 3, "means" has been replaced with – device --, otherwise "the compensating means" recited has no antecedent basis.

Fully amended texts are given below:

13.(Currently Amended) The device of Claim 5, further comprising a photodiode or a phototransistor configured to measure a level of light output from the prism, and further configured to provide a correction signal to the ~~compensation means~~  
compensating device.

Art Unit: \*\*\*

14.(Currently Amended) The device of Claim 5, comprising a memory of target voltages for the plurality of electrodes, wherein the memory is in communication with the compensating [[means]] device.

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Best reference noted is GB 2265024. However, despite the striking similarity of the reference, the present invention characterizes a clear difference therefrom as noted in paragraphs [0042] – [0047] of the specification. Further, the reference does not teach or fairly suggest that the excitation voltage source is configured to generate a wave pattern on a surface of the membrane ( second layer 5 ) that is positioned adjacent a surface of a prism. Still further, the excitation voltage source of the reference in consideration does not have any compensating device that is responsible for causing the membrane to return to initial state upon removal of the excitation voltages. And more importantly, the publication date of the reference is after the effective filing date of the present application. Therefore, in light of the above, it is concluded that the present invention distinguishes over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
